FUND MANAGERS

Euan McNeil is an investment manager in the fixed income team.
Iain Buckle is an investment manager in the fixed income team with responsibility for credit analysis, particularly securitised and structured finance assets.

FUND SPECIFIC RISKS

- Investment returns on fixed interest securities, such as corporate and government bonds, are particularly sensitive to trends in interest rate movements and inflation. Their values are likely to fall when interest rates rise. Such falls may be more pronounced in a low, or negative interest rate environment and longer dated fixed interest securities will fall by more than short dated fixed interest securities.
- The fund invests in fixed interest securities. The financial strength of a company or government issuing the security determines their ability to make some or all of the payments due. If this financial strength weakens, the chances of them not making payments increases and this will reduce the Fund's value.
- Legal & General have made a commitment to address climate change by engaging directly with the largest companies in the world who hold the key to meeting the 2 degree Paris climate change target (COP 21). The companies will be assessed by LGIM for robustness of their strategies, governance & transparency. Within this Fund's investment policy, companies that fail to meet LGIM's minimum standards in low carbon transition and corporate governance standards may be excluded from the Fund.
- The fund should be utilised as part of a diversified investment strategy within a wider portfolio of funds. These funds are not designed to be solely invested in.
- This fund is able to delay paying out, which may mean that you have to wait to get your money. A delay may happen when market conditions mean it is difficult for the fund manager to cash in investments to pay out to investors. For example, a fund with investments in commercial properties may find they may take time to sell. Whilst waiting to complete on the sale of properties, the fund manager may suspend making payments to investors who want to cash in. The fund can only delay paying out if it is in the interests of all investors.
