## FUND SPECIFIC RISKS

- The fund invests in equities (shares of companies), so there is a higher risk of the fund's value being volatile (i.e. going up and down) than with a fund which invests in most other asset types, particularly in the short term.
- The Fund may undertake derivative transactions as part of efficient portfolio management ("EPM") or reduction in investment risk in line with the Historic FCA Permitted Links rules
- This fund invests in equities issued by smaller companies. These investments tend to be riskier than investments in larger companies because they may be harder to buy and sell and their price may be more volatile- particularly in the short term.
- The investment policy applied to this fund may mean that it cannot invest in some companies or in certain sectors. These restrictions mean that should the sectors in which the fund cannot invest be the best performing ones the value of the Fund will not increase as strongly as the value of funds which can invest in these sectors.
- Legal & General have made a commitment to address climate change by engaging directly with the largest companies in the world who hold the key to meeting the 2 degree Paris climate change target (COP 21). The companies will be assessed by LGIM for robustness of their strategies, governance & transparency. Within this Fund's investment policy, companies that fail to meet LGIM's minimum standards in low carbon transition and corporate governance standards may be excluded from the Fund.
- The fund should be utilised as part of a diversified investment strategy within a wider portfolio of funds. These funds are not designed to be solely invested in.
- This fund is able to delay paying out, which may mean that you have to wait to get your money. A delay may happen when market conditions mean it is difficult for the fund manager to cash in investments to pay out to investors. For example, a fund with investments in commercial properties may find they may take time to sell. Whilst waiting to complete on the sale of properties, the fund manager may suspend making payments to investors who want to cash in. The fund can only delay paying out if it is in the interests of all investors.
