

# L&G PMC Janus Henderson Fixed Interest Monthly Income Fund 3

WorkSave Buy Out Plan/WorkSave Pension Plan/WorkSave Pension Trust

## FUND AIM

The Fund aims to provide a high income by investing at least 80% of assets in a global portfolio of bonds of any quality, including high yield (non-investment grade) bonds, issued by governments, companies or any other type of issuer. Where investments are made in assets in currencies other than Sterling, the Fund will seek to hedge at least 80% of those assets back to Sterling to largely remove the risk of currency exchange rate movements.

## RISK AND REWARD PROFILE

The fund's risk rating is based on the historic volatility of the fund's value and it may change in the future.

Investment funds with a lower risk profile typically exhibit fewer price fluctuations and therefore a lower probability of temporary capital losses. Funds with a high risk rating typically experience greater fluctuations in value and maintain a greater risk of capital losses.

For more information on the investment risks that are specific to this fund, please refer to the Fund Specific Risks section on page 3.

Performance data source: Lipper. **Returns are calculated on the basis of daily midday dealing prices, those at which you transact.** Other fact sheets may show returns on a different basis, e.g. daily midday mid-market prices. Fund performance is shown net, which is after the deduction of the fund management charge.

The fund performance does not take account of any product charges applicable to your scheme. You can find more information about our charges in the terms and conditions booklet (for example, the Member's Booklet and Member's Policy Booklet) or Key Features documents.

**Past performance is not a guide to the future. The value of an investment is not guaranteed and can go down as well as up. Exchange rate variations can cause the value of overseas investments to increase or decrease. You may not get back the amount you originally invested. For overseas markets the figures are sterling adjusted and net of any withholding tax.**

**Important: a fund switch affecting this fund occurred in the past – see page 3 for details**

## CHARGES

Investment management charge (IMC) **0.62%**

Additional expenses (AE) **0.04%**

Fund management charge (FMC = IMC + AE) **0.66%**

The IMC is taken by adjusting the unit price of the fund daily.

She holds the Chartered Financial Analyst designation and is a member of the Society of Technical Analysts having passed the STA diploma exam. She has 9 years of financial industry experience.

## FUND SPECIFIC RISKS

- Investment returns on fixed interest securities, such as corporate and government bonds, are particularly sensitive to trends in interest rate movements and inflation. Their values are likely to fall when interest rates rise. Such falls may be more pronounced in a low, or negative interest rate environment and longer dated fixed interest securities will fall by more than short dated fixed interest securities.
- The fund invests in fixed interest securities. The financial strength of a company or government issuing the security determines their ability to make some or all of the payments due. If this financial strength weakens, the chances of them not making payments increases and this will reduce the Fund's value.
- The fund invests in higher yielding bonds (known as 'sub-investment grade' bonds). Compared to lower yielding bonds (known as 'investment grade' bonds) there is a greater risk that the fund will not receive back, either on time or at all, some or all of the amount invested or interest that is due to be paid.
- The Fund may undertake derivative transactions in line with the FCA Conduct of Business rules (COBS 21). The Fund may invest in other collective investment schemes, which use derivatives for investment purposes as opposed to solely for efficient portfolio management or reduction in investment risk.
- The Fund may hold Over the Counter ("OTC") derivative contracts with banks or other financial institutions. If these organisations experience financial difficulty, they may be unable to pay back the sums that they owe under the OTC derivative contracts. If this happens, the value of the investment will fall.
- The fund invests in inflation-linked bonds, which are particularly sensitive to changes in inflation rates. Their values are likely to fall when inflation rates fall.
- The fund should be utilised as part of a diversified investment strategy within a wider portfolio of funds. These funds are not designed to be solely invested in.
- This fund is able to delay paying out, which may mean that you have to wait to get your money. A delay may happen when market conditions mean it is difficult for the fund manager to cash in investments to pay out to investors. For example, a fund with investments in commercial properties may find they may take time to sell. Whilst waiting to complete on the sale of properties, the fund manager may suspend making payments to investors who want to cash in. The fund can only delay paying out if it is in the interests of all investors.
