

L&G PMC M&G PP All Stocks Corporate Bond G25

WorkSave Pension Plan/Portfolio Plus Trustee Investment Plan/Trustee Buyout Plan

FUND AIM

The fund invests mainly in high quality Sterling corporate bonds across the range of maturities. The fund is actively managed against its benchmark, the iBoxx Sterling Non-Gilts Index. The fund may also hold UK government gilts and limited amounts of high yield and hedged non-sterling corporate bonds. Derivative instruments may be used for efficient portfolio fund management.

RISK AND REWARD PROFILE

The fund's risk rating is based on the historic volatility of the fund's value and it may change in the future.

Investment funds with a lower risk profile typically exhibit fewer price fluctuations and therefore a lower probability of temporary capital losses. Funds with a high risk rating typically experience greater fluctuations in value and maintain a greater risk of capital losses.

For more information on the investment risks that are specific to this fund, please refer to the Fund Specific Risks section on page 3.

Performance data source: Lipper. **Returns are calculated on the basis of daily midday dealing prices, those at which you transact.** Other fact sheets may show returns on a different basis, e.g. daily midday mid-market prices. Fund performance is shown net, which is after the deduction of the fund management charge.

The fund performance does not take account of any product charges applicable to your scheme. You can find more information about our charges in the terms and conditions booklet (for example, the Member's Booklet and Member's Policy Booklet) or Key Features documents.

Past performance is not a guide to the future. The value of an investment is not guaranteed and can go down as well as up. Exchange rate variations can cause the value of overseas investments to increase or decrease. You may not get back the amount you originally invested. For overseas markets the figures are sterling adjusted and net of any withholding tax.

CHARGES

Investment management charge (IMC) **0.45%**

Additional expenses (AE) **0.02%**

Fund management charge (FMC = IMC + AE) **0.47%**

The IMC is taken by adjusting the unit price of the fund daily.

JAMIE HAMILTON

Jamie joined M&G Investments in 2001, as a Fund Manager in the fixed income team, managing a range of institutional corporate bond funds. Prior to joining M&G, Jamie worked for Dresdner RCM Global Investors as a fixed income fund manager, managing corporate bond funds. Jamie graduated from Newcastle University with a degree in Economics and is a CFA charter-holder.

FUND SPECIFIC RISKS

- Investment returns on fixed interest securities, such as corporate and government bonds, are particularly sensitive to trends in interest rate movements and inflation. Their values are likely to fall when interest rates rise. Such falls may be more pronounced in a low, or negative interest rate environment and longer dated fixed interest securities will fall by more than short dated fixed interest securities.
- The fund invests in fixed interest securities. The financial strength of a company or government issuing the security determines their ability to make some or all of the payments due. If this financial strength weakens, the chances of them not making payments increases and this will reduce the Fund's value.
- The Fund may undertake derivative transactions as part of efficient portfolio management ("EPM") or reduction in investment risk in line with the Historic FCA Permitted Links rules
- The Fund may hold Over the Counter ("OTC") derivative contracts with banks or other financial institutions. If these organisations experience financial difficulty, they may be unable to pay back the sums that they owe under the OTC derivative contracts. If this happens, the value of the investment will fall.
- The fund should be utilised as part of a diversified investment strategy within a wider portfolio of funds. These funds are not designed to be solely invested in.
- This fund invests in a PMC fund, which in turn invests in a unit linked life fund provided by an insurer outside of the Legal & General Group. This is achieved through a re-insurance agreement between PMC and the external insurer. Legal and General Assurance Society Limited (LGAS) bears the credit risk of PMC becoming insolvent but does not take on the re-insurance credit risk associated with the insolvency of the external insurer. This means that if PMC becomes insolvent, LGAS will make good any shortfall in the value of your investments which it is unable to recover from PMC. However, if the external insurer becomes insolvent, the value of your investment held within this fund will be at risk. In the event that the external insurer becomes insolvent, the value of your investment held in this fund will not be covered by the Financial Services Compensation Scheme.
- This fund is able to delay paying out, which may mean that you have to wait to get your money. A delay may happen when market conditions mean it is difficult for the fund manager to cash in investments to pay out to investors. For example, a fund with investments in commercial properties may find they may take time to sell. Whilst waiting to complete on the sale of properties, the fund manager may suspend making payments to investors who want to cash in. The fund can only delay paying out if it is in the interests of all investors.
