

L&G PMC CT Global Select G25

WorkSave Pension Plan/Portfolio Plus Trustee Investment Plan/Trustee Buyout Plan

FUND AIM

The Fund aims to achieve capital growth over the long term (5 years or more). It also looks to outperform the MSCI ACWI Index ("the Index") over rolling 3-year periods, after the deduction of charges.

RISK AND REWARD PROFILE

The fund's risk rating is based on the historic volatility of the fund's value and it may change in the future.

Investment funds with a lower risk profile typically exhibit fewer price fluctuations and therefore a lower probability of temporary capital losses. Funds with a high risk rating typically experience greater fluctuations in value and maintain a greater risk of capital losses.

For more information on the investment risks that are specific to this fund, please refer to the Fund Specific Risks section on page 3.

Performance data source: Lipper. **Returns are calculated on the basis of daily midday dealing prices, those at which you transact.** Other fact sheets may show returns on a different basis, e.g. daily midday mid-market prices. Fund performance is shown net, which is after the deduction of the fund management charge.

The fund performance does not take account of any product charges applicable to your scheme. You can find more information about our charges in the terms and conditions booklet (for example, the Member's Booklet and Member's Policy Booklet) or Key Features documents.

Past performance is not a guide to the future. The value of an investment is not guaranteed and can go down as well as up. Exchange rate variations can cause the value of overseas investments to increase or decrease. You may not get back the amount you originally invested. For overseas markets the figures are sterling adjusted and net of any withholding tax.

WILLIAM DAVIES

William Davies is Global Head of Equities at Columbia Threadneedle Investments. He took up this role in July 2017 and has overall responsibility for the company's equity teams. Prior to this, he was Head of Equities, EMEA and headed the Global Equities team. William is the lead manager of the Threadneedle Global Select Fund. William was previously Head of European Equities at the company from 1999 to 2011. He joined Threadneedle Asset Management Limited at the company's inception in 1994. Before this he worked for Eagle Star Investments¹. He has also worked for Hambros Bank as a European Investment Manager where he led the European equity team. William holds a BA (Hons) in Economics from Exeter University.

FUND SPECIFIC RISKS

- The fund invests in equities (shares of companies), so there is a higher risk of the fund's value being volatile (i.e. going up and down) than with a fund which invests in most other asset types, particularly in the short term.
- Investment returns on fixed interest securities, such as corporate and government bonds, are particularly sensitive to trends in interest rate movements and inflation. Their values are likely to fall when interest rates rise. Such falls may be more pronounced in a low, or negative interest rate environment and longer dated fixed interest securities will fall by more than short dated fixed interest securities.
- The fund invests in fixed interest securities. The financial strength of a company or government issuing the security determines their ability to make some or all of the payments due. If this financial strength weakens, the chances of them not making payments increases and this will reduce the Fund's value.
- The Fund may hold assets in currencies that are not denominated in sterling. If the value of these currencies falls compared to sterling this may cause the Fund's value to go down. Some Funds may employ currency hedging as a means of protecting the Fund's value against currency movements. In extreme market conditions, the hedge may not be perfect and the Fund may be exposed to currency changes.
- The Fund may undertake derivative transactions as part of efficient portfolio management ("EPM") or reduction in investment risk in line with the Historic FCA Permitted Links rules
- The fund should be utilised as part of a diversified investment strategy within a wider portfolio of funds. These funds are not designed to be solely invested in.
- This fund is able to delay paying out, which may mean that you have to wait to get your money. A delay may happen when market conditions mean it is difficult for the fund manager to cash in investments to pay out to investors. For example, a fund with investments in commercial properties may find they may take time to sell. Whilst waiting to complete on the sale of properties, the fund manager may suspend making payments to investors who want to cash in. The fund can only delay paying out if it is in the interests of all investors.
